PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 3+ years of experience in AWS, CI/CD automation, Kubernetes, Docker, and Terraform. Skilled in building scalable cloud infrastructure, automating deployment pipelines using **GitHub Actions & Jenkins**, and managing containerized applications. Hands-on experience with **Prometheus** and **Grafana** for monitoring, observability, and system reliability. Passionate about **infrastructure automation, cloud-native solutions, and optimizing deployment workflows.**

TECHNICAL SKILLS

- **Containerization & Orchestration:** Docker, Kubernetes (K8s), Helm
- **CI/CD & Automation:** GitHub Actions
- **Infrastructure as Code (IaC) :** Terraform
- **Cloud Platforms:** AWS (EC2, S3, RDS, IAM, VPC, EKS) and basic exposure to GCP services
- **Monitoring & Logging:** Prometheus, Grafana,
- **Operating Systems & Administration:** Linux, Networking (Load Balancers, DNS, Ingress, Firewalls)
- **Databases:** MongoDB, RDS
- **Programming & Scripting:** Shell Scripting, Bash
- **DevOps Practices:** Continuous Integration & Continuous Deployment (CI/CD), Agile
- **Version Control & Collaboration:** Git, GitHub

PROFESSIONAL EXPERIENCE

DEVOPS/SYSTEM ENGINEER | GEMINUSTECH PVT LTD | FEB 2025 – NOV 2025

- Managed Linux servers and AWS infrastructure across development and production environments.
- Built and maintained CI/CD pipelines for automated build and deployment workflows.
- Deployed and managed Kubernetes workloads on AWS EKS clusters.
- Automated infrastructure provisioning using Terraform and improved deployment consistency.
- Managed Docker image lifecycle and optimized container builds stored in AWS ECR.
- Implemented monitoring and alerting solutions using Prometheus and Grafana.
- Applied cloud security best practices using IAM policies, security groups, and NACL configurations.
- Provided level 1 production support as a DevOps engineer for technical and operational assistance
- Assisted in troubleshooting production issues and performing root cause analysis.

DEVOPS ENGINEER | HISAN-LAB PVT LTD | AUG 2024 – JAN 2025

- Assisted in building and maintaining CI/CD pipelines using GitHub Actions and Jenkins.
- Supported deployment of Dockerized applications on AWS EKS clusters.
- Worked with AWS services including EC2, S3, IAM, and VPC for infrastructure support.
- Helped automate infrastructure provisioning using Terraform under senior guidance.
- Assisted in integrating Trivy and SonarQube security scans into CI/CD workflows.
- Monitored application performance using Prometheus and Grafana dashboards.
- Supported Auto Scaling Group and Load Balancer configuration for application availability.

DEVOPS ENGINEER (CLOUD SUPPORT ENGINEER) | ARCATRON MOBILITY PVT. LTD. | FEB 2022 – NOV 2023

- Performed quality assurance and production validation processes to ensure product compliance and operational standards.
- Automated reporting and internal tracking processes using Bash scripting to improve efficiency.
- Supported Linux-based systems and maintained internal servers used for testing and reporting.
- Assisted in managing AWS EC2 instances and S3 storage for internal tools and documentation systems.
- Implemented basic CI/CD workflows for internal test applications as part of DevOps learning initiatives.
- Containerized internal test applications using Docker for development environment consistency.
- Explored Kubernetes deployments on AWS EKS as part of infrastructure modernization efforts.
- Maintained system uptime and monitoring using CloudWatch.

GEMINUSTECH PVT LTD, PUNE
DEVOPS ENGINEER
PROJECT: APIX (APISecurity)

- Designed and managed Docker-based environments using Docker Compose for local development and testing.
- Migrated containerized applications from **Docker** Compose to **Kubernetes** for scalability and high availability
- Deployed and maintained **Kubernetes workloads (Deployments, Services, ConfigMaps, Secrets, Ingress)** on Minikube and **AWS EKS**.
- Built CI/CD pipelines in **GitHub Actions** and **Jenkins** to automate code builds, Docker image creation, and deployments to Kubernetes.
- Managed and optimized container images using Docker, **AWS ECR**, and **GitHub Packages**.
- Configured Ingress Nginx as a reverse proxy and load balancer to route application traffic.
- Integrated **Trivy** and **SonarQube** scans into CI/CD workflows for vulnerability detection and code quality checks.
- Implemented application monitoring and alerting using Prometheus and Grafana dashboards.
- Automated infrastructure provisioning and environment setup using Terraform and Ansible.
- Worked with **AWS services (EC2, S3, VPC, IAM, RDS, EKS)** for application hosting and infrastructure management.
- Created and enforced backup strategies for databases and critical workloads.
- Managed version control and branching strategies in **Git**, enabling smooth collaboration between development and operations teams.

Project 2: AWS Three-Tier Application Design and Deployment (High Availability and Scalable Three-Tier Architecture Implementation)
Project 3 - AWS Infrastructure Automation using Terraform and Jenkins
Project 4 - Kubernetes Three-Tier application deployment

EDUCATION

Bachelor of Computer Application	2018
Shivaji University, Kolhapur	
XII (state board)	2015
Yeshwant Jr. College, Ahmedpur
