PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 4.5+ years of experience in AWS, CI/CD automation, Kubernetes, Docker and Terraform. Skilled in building scalable cloud infrastructure, automating deployment pipelines using GitHub Actions & Jenkins, and managing containerized applications. Hands-on experience with Prometheus and Grafana for monitoring, observability, and system reliability. Passionate about infrastructure automation, cloud-native solutions, and optimizing deployment workflows

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, VPC, S3, EKS, ECS, ECR, IAM, RDS, CloudFront, Route 53, CloudWatch, Lambda) **Containerization & Orchestration:** Docker, Kubernetes (Pods, Deployments, Services, ConfigMaps, HPA, Helm) **Infrastructure as Code:** Terraform, Ansible
CI/CD Tools: Jenkins, GitHub Actions, ArgoCD
Monitoring & Observability: Prometheus, Grafana, AWS CloudWatch
Security & Code Quality: Trivy, SonarQube, IAM Policies, Least-Privilege Access
Build & Version Control: Maven, Git, GitOps
Databases: MySQL, Amazon RDS, MongoDB

WORK EXPERIENCE

p2pXperts Pvt Ltd

Jan 2024 – Present

DevOps / Cloud Engineer

- Provisioned and managed scalable AWS infrastructure (EC2, S3, VPC, RDS, Lambda), achieving 99.9% uptime SLA across production workloads.
- Designed end-to-end CI/CD pipelines using Jenkins, GitHub Actions, GitLab CI, and AWS CodePipeline, reducing average deployment time by ~40%.
- Automated infrastructure provisioning with Terraform, enabling version-controlled environments and cutting manual setup effort by 60%.
- Containerized microservices with Docker and orchestrated deployments on Kubernetes, improving deployment frequency and minimizing rollback incidents.
- Implemented centralized monitoring using AWS CloudWatch, Prometheus, and Grafana, reducing mean time to detect (MTTD) critical issues by 35%.
- Enforced cloud security best practices via IAM roles and least-privilege access policies, ensuring full compliance with organizational security standards.
- Architected and maintained CI/CD pipelines with Jenkins and GitLab CI, automating workflows for high-availability financial trading applications.
- Implemented GitOps-driven deployments via ArgoCD on Kubernetes, ensuring consistent, auditable releases and reducing deployment errors by ~50%.
- Provisioned and managed AWS infrastructure (EC2, EBS, S3, IAM, VPC) via Terraform, enabling on-demand scalability for workloads.
- Deployed and maintained 15+ containerized microservices on Kubernetes across development, staging, and production environments.

- Built Prometheus/Grafana observability dashboards with proactive alerting, reducing incident response time by 30%.
- Automated Maven-based build pipelines (WAR/EAR) and configured Git hooks to trigger Jenkins jobs, eliminating manual build triggers and accelerating release cycles.
- Applied regular security patches and OS updates to Linux/Ubuntu EC2 instances, maintaining zero critical vulnerabilities across managed servers.

Arcatron Mobility Pvt Ltd, PUNE

Feb 2022 – Nov 2023

Cloud support Engineer

- Monitored cloud infrastructure and application performance using AWS CloudWatch to ensure timely resolution of issues.
- Responded to and resolved customer inquiries and issues related to AWS EC2, S3, and other services, providing timely and effective solutions.
- Configured and managed IAM roles, security groups, and network ACLs to ensure secure and compliant access to AWS resources.
- Troubleshooted and resolved EC2 instance issues, including debugging, resizing, and implementing auto-scaling to optimize workload performance.
- Conducted in-depth analysis of recurring issues, providing detailed solutions and implementing preventive measures to reduce future incidents.
- Designed and implemented robust backup and disaster recovery strategies using AWS snapshots and AMIs.
- Analyzed resource utilization and implemented cost-optimization strategies, including rightsizing and reserved instances. Ensured adherence to service level agreements (SLAs), maintaining high customer satisfaction and resolving issues promptly.
- Developed and maintained standard operating procedures (SOPs) for cloud infrastructure management, improving team efficiency and reducing error rates.
- Collaborated with internal teams, sharing knowledge and best practices to improve overall cloud infrastructure management and support.

EDUCATION

Bachelor of Computer Applications

Shivaji University, Kolhapur | 2015 – 2018
